Colfax International selected as Authorized Integrator of Dolphin Products

Provides integrated solutions for remote PCI Express IO and accelerator scaling

Sunnyvale, CA & Marlborough, MA – February 23, 2009 – Dolphin Interconnect Solutions, a global provider of high performance PCI Express interconnect solutions, today announced that Colfax International has been signed as an Authorized Integrator for its expansion products. Dolphin's PCI Express expansion products are exclusively available through its Authorized Integrators ensuring the highest level of customer support including validation, benchmarking, customization and integration.

Colfax International is a leading provider of innovative and expertly engineered workstations, servers, clusters, storage, and personal supercomputing solutions. Through partnerships with premier technology providers, Colfax provides customized solutions engineered for high performance, reliability, serviceability and rapid deployment. Colfax has the technical sophistication to ensure customers receive appropriate support throughout their evaluation and integration process.

"Dolphin is focused on innovation and development of high performance components based on PCI Express technology that accelerate customer's applications. We are pleased to partner with Colfax to bring our solutions out to new markets," says Tim Miller, CEO of Dolphin Interconnect Solutions. "Our most demanding customers are looking for purpose built systems where high performance and low cost are common requirements. With Dolphin's advanced product lines and Colfax's full-service approach to translate advanced technologies into business value, we are in a good position to service this market."

"At Colfax, our mission has always been to combine our vision and experience to deliver innovative, state of the art and highly optimized solutions to help meet the unique needs

of each customer. Fulfilling our mission requires state of the art technology components, and Dolphin's line of high performance products based on PCI Express fits perfect into our portfolio," said Gautam Shah, Colfax CEO.

Dolphin's expansion products are well suited for applications in the security, video, financial, scientific and industrial markets. Dolphin's PCI Express expansion solutions enable up to 8 PCI Express IO or accelerator modules to be housed in a remote chassis which can be positioned up to 300 meters from the host server. Enhanced capabilities allow dual 8x PCI Express links between the remote chassis and server (40Gb/sec), as well as connection to multiple servers from a single expansion chassis.

Dolphin's partnership with Colfax will expand in coming months with the introduction of additional PCI Express solutions and appliances slated for Q2.

About Colfax International

Colfax International is a global provider of customized workstations, servers, clusters and storage solutions. Colfax International combines unparalleled experience in hardware and software architecture with an unwavering commitment to customer service to deliver solutions that meet or exceed the unique needs of each customer. Founded in 1987, Colfax International is based in Sunnyvale, California and is privately held. For more information, please visit www.colfaxinternational.com.

About Dolphin Interconnect Solutions

Dolphin Interconnect Solutions of Oslo, Norway and Marlborough, Massachusetts (USA) accelerates applications by providing ultra low-latency, high-bandwidth computer interconnect solutions based on PCI Express. These products provide very low overhead communication, extremely low latencies and high throughput, all vital factors for communication that requires frequent transfer of small data packets and are ideal for clustered database, web services and many industrial applications. The Dolphin software library is fully transparent to applications making application integration easy. Dolphin's PCI Express expansion products are fully compatible with off the shelf application software and device drivers. For more information, please visit www.dolphinics.com.
